## Elijah And The Widow

Elijah was hungry and thirsty.  
Without any rain the food had all gone.  
God said, "Go to another town  
and find a widow lady and her boy."

2

Until the rain came and  
the corn and wheat grew,  
there was always oil in her jar  
and flour for bread.

So the lady trusted God  
and did what Elijah said.  
When she looked in flour bin  
there was flour left for the next day!

6

Elijah went to the town and found them  
picking up wood for their fire.  
“Please will you give me a drink of water  
and a little bread?” he asked.

She said, "I only have a little flour  
and a little oil for one last bread roll."  
"Cook one for me first and there  
will be enough for you both," he told her.

4

"Don't worry.  
God told me that he will  
give us enough to eat.  
We will trust God."
