

The Monarch Butterfly flies over the garden looking for a Swan Plant to lay eggs on. The life cycle of the Monarch Butterfly begins again.

We had some Swan Plant seeds to grow.

The Monarch Butterfly flies over the garden looking for a Swan Plant to lay eggs on. The life cycle of the Monarch Butterfly begins again.

We had some Swan Plant seeds to grow.

We planted the seeds in the garden and watered them.

7

The caterpillar eats a lot of Swan Plant leaves.
When the butterfly is big and fat,
it hangs upside down on a branch
and pops out of its skin!

6

In about a week they
began to grow. We
could see the little
green shoots!

3

The seeds grew into a Swan Plant bush.
 One day a Monarch Butterfly
 flew into the garden
 and laid her eggs on the leaves.

4

Inside the egg a little caterpillar
 was growing. It wiggled out of the egg.
 The little caterpillar looked
 for Swan Plant leaves to eat!
